Special Issue Acknowledgments

Linda Coates-Markle, who previously served as the Bureau of Land Management Liaison to the SRM and organized the SRM Annual Meeting Special Session that prompted these articles, would like to thank the cosponsors of this special issue: the Division of Rangeland Resources, Bureau of Land Management, Washington, DC, USA, and the Agricultural Research Service, Reno, Nevada, USA. Their contributions have helped make this special issue a reality.

The Agricultural Research Service (ARS) is the USDA’s chief scientific research agency. ARS conducts research to develop and transfer solutions to agricultural problems of high national priority. The Natural Resources and Sustainable Agricultural Systems National Programs support researchers in developing technologies and strategies for stewardship of the diverse agricultural mosaic. For more information, see http://ars.usda.gov.

The mission of the Bureau of Land Management is to sustain the health, productivity, and diversity of America’s public lands for the use and enjoyment of present and future generations. For more information, see http://www.blm.gov.

¹Division name changing to Division of Forest, Rangeland, Riparian and Plant Conservation.
